### 3. Submit:

Your feedback will be used to enhance the application's functionality and user experience.

---

## Technical Overview

Frontend: Developed using HTML, CSS, and JavaScript for a responsive user interface.

Backend: Powered by Flask, facilitating efficient server-side operations.

AI Integration: Utilizes Dialogflow for natural language processing and understanding.

APIs: Incorporates Google Maps API to assist in locating nearby healthcare facilities.

---

## FAQs

Q: Is the Health Buddy AI Doctor a replacement for professional medical advice?

A: No. The application provides preliminary information and should not replace consultations with qualified healthcare professionals.

Q2: Is my personal information secure?

A: Yes. The application adheres to standard data protection protocols to ensure user privacy and security.

Q3: Can I access the application on mobile devices?

A: Yes. The web application is optimized for both desktop and mobile browsers.
